PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building APIs, SaaS platforms and e-commerce systems with Node.js, TypeScript, NestJS and React/Next.js. Worked on high-volume retail platforms, rebuilt a legacy SaaS into a modern SPA, and set up automated test pipelines with CI/CD. Focused on clean architecture, testing (TDD, Playwright) and secure authentication and access control. Currently pursuing a postgraduate degree in Offensive Cyber Security and Red Team Operations.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Java, Python

Back-end: Node.js, NestJS, Express, REST APIs, GraphQL, Socket.IO, RabbitMQ, Microservices, JWT, Magento (integrations)

Front-end: React, Next.js, Angular, NextAuth, SCSS, Accessibility (a11y)

Databases: PostgreSQL, MySQL

Testing and DevOps: Playwright, Cypress, Jest, TDD, CI/CD, Jenkins, Docker, AWS (SQS), Azure DevOps

Tools: Git, GitLab, Bitbucket, Jira, Confluence, Postman, Insomnia

Practices: Scrum, Kanban, Code review, Technical documentation, Application security

PROFESSIONAL EXPERIENCE

Innovo Tecnologia da Informação Ltda. | Full Stack Developer
08/2026 – Present | *Joinville, SC, Brazil*

FI Group | Development Analyst
01/2024 – 12/2025 | *São Paulo, SP, Brazil*

- Carried out the full refactor of a SaaS product, from the UI to integrations, authentication and core system, migrating a legacy architecture to a modern, scalable, reusable SPA.
- Built a reusable Context-based template, adopted as the standard for multiple company applications.
- Implemented authentication, access control and security with NextAuth, JWT and Node.js.
- Built accessible (a11y) reusable components focused on user experience.
- Implemented real-time communication with Socket.IO, laying the groundwork for an internal messaging system.
- Handled deployments, versioning, dependency upgrades and business-rule fixes, and built internal debugging tools.

Aliare | Test Automation Developer
10/2023 – 01/2024 | *Santo Ângelo, RS, Brazil*

- Developed and maintained automated tests for an ERP application, with a quality-focused full stack approach.
- Built Jenkins CI/CD pipelines that run tests automatically before each release.
- Migrated the entire test suite from Cypress to Playwright, creating a more stable and scalable architecture.

Compasso UOL | Junior Back-end Developer
04/2021 – 04/2023 | *Erechim, RS, Brazil*

- Built and maintained REST and GraphQL APIs in Node.js and NestJS, integrated with Magento.
- Designed the back end of the Iguatemi 365 sales application, handling hundreds of thousands of SKUs and a high volume of users.
- Refactored SQL-based integrations to GraphQL, replacing multiple calls with a single query.
- Created a dynamic screen-composition system driven by JSON payloads, allowing customization per customer profile.
- Handled bug fixes, feature evolution and performance optimization of back-end services.

Metta | Intern
12/2020 – 02/2021

- Intensive web development and e-commerce training: Magento (modules, themes and integrations), KnockoutJS (MVVM and data binding) and legacy code reading.

PROJECTS

Distributed Wagering Processor | github.com/TheNewGuy100/Distributed-Wagering-Processor
Processes betting transactions from multiple game providers and stays correct under duplicated, out-of-order and concurrent messages. TypeScript, NestJS, MikroORM, PostgreSQL, AWS SQS, Docker, Grafana, Prometheus and Keycloak.

uberGraph | github.com/TheNewGuy100/uberGraph
Evidence-driven modding toolkit and AI bridge for Unreal Engine games. Python.

EDUCATION

Postgraduate Degree in Offensive Cyber Security and Red Team Operations
Impacta Tecnologia | 05/2026 – 05/2027 (in progress)

Bachelor's Degree in Computer Science
Regional Integrated University of Upper Uruguay and Missions (URI) | 2020 – 2025

Technical High School Diploma
Escola Técnica Estadual Presidente Getúlio Vargas | 2017 – 2020

CERTIFICATIONS

- Node.js Microservices: NestJS, RabbitMQ and Cloud Services
- REST API with Node.js and TDD from the start
- Next.js and TypeScript with Shopify Integration
- Docker: Building Containers the Easy Way

LANGUAGES

- Portuguese: native
- English: full professional proficiency
